

SUSHANT STORE REPORT

PROJECT BY :- BHIVANSHU SHRIVASTAVA

Project Overview

The project aims to analyze store performance data to uncover sales trends, customer behavior, and product profitability. The goal is to design a dashboard that highlights KPIs and provides actionable insights for better decision-making.

Dataset

- Source → Sushant Store sales records (Excel file).
 - Fields (likely) → Date, Product, Category, Quantity, Price, Discount, Customer ID, Region.
 - Granularity → Transaction-level data.
 - Purpose → To measure sales, profitability, and customer engagement.
- 
- 
- 

Dashboard & KPIs

KPIs

- Total Sales Revenue
- Average Order Value (AOV)
- Gross Margin %
- Top-Selling Products & Categories
- Customer Count & Repeat Rate
- Inventory Turnover

Dashboard

- Top Row → KPI Cards (Revenue, Margin, Orders, Customers).
- Left Panel → Category-wise bar chart.
- Right Panel → Trend line chart (sales over time).
- Center → Pie chart (discount vs full-price sales).
- Bottom → Filters (Date, Category, Region, Customer type).

Key Insights & Observations

- Category Trends → Which categories dominate revenue.
- Seasonality → Identify peak months/days.
- Discount Effectiveness → Do discounts boost sales or hurt margins?
- Customer Segmentation → Loyal vs one-time buyers.
- Profit Drivers → High-margin vs high-volume products.

Learning & Conclusions

Learning

- Data cleaning, KPI modeling, and visualization are essential for clarity.

Conclusions

- Discounts may drive volume but reduce margins.
- Certain categories/products consistently outperform.
- Repeat customers are crucial for sustainable growth.
- A well-structured dashboard turns raw data into actionable insights.

The background features abstract geometric shapes. In the top-left and bottom-right corners, there are solid teal-colored polygons. On the left and right sides, there are orange-colored lines forming chevron-like shapes that point towards the center.
